PALMIERI

At Palmieri, an engineering team continually expands their range of standard collections, while liaising with individual clients to create custom designs and modifications. Their veneering department ensures the crucial step that many of our competitors can't deliver: selecting and laying-up premium-grade veneers and solids by hand. Select, ready-cut veneers in oak, cherry, maple and mahogany are flitch-inventoried to allow ready production. To further insure quality, Palmieri has an in house steel facility. This allows for easy customization and guarantees a quality end result .

System 30/3000

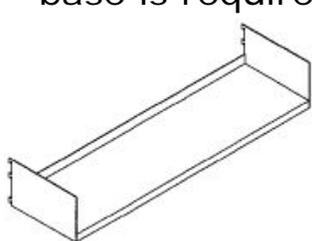

System 30/3000 is the industry's most advanced and cost effective single-slot library shelving system offering many benefits over traditional welded frame or wood shelving.

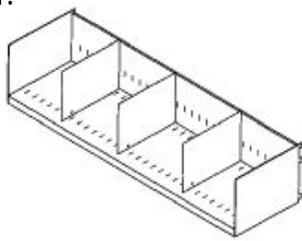

Some of these benefits are a narrower footprint with no overhead bracing or floor fastening, additional storage space due to single slot design, thicker shelves which prevent shelf deflection over time, hundreds of accessories to store various collections easily, and the system can grow in height over time.

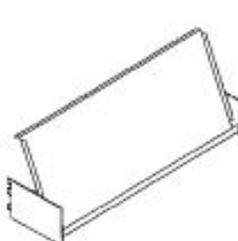

Some additional benefits of System 30/3000 is the snap together design allows for faster installation and greater flexibility for reconfiguration, can accommodate any style or type of end panels or be installed without end panels, and can be installed with an open base. With other types of shelving, a closed base is required.

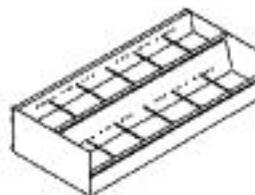

Integral Back Shelves

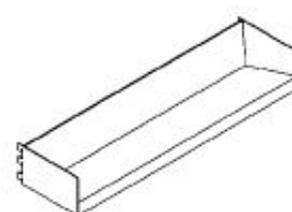

Divider Shelves

Hinged Periodical Shelf

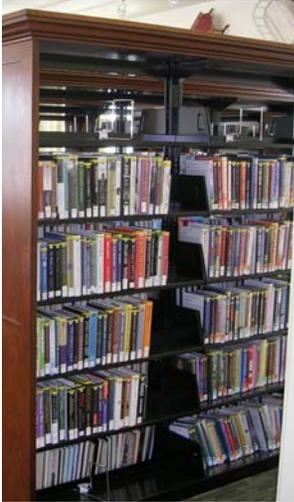

Double Tier Browsing Boxes

Multi-Media Display Shelf

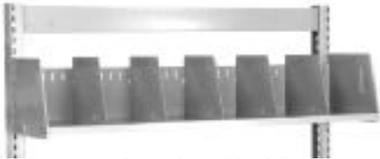

Industries

System 1000 is your basic welded frame design. While it doesn't have all the capabilities of System 30/3000 it can be free standing with no overhead bracing or floor fastening as long as the base shelf is deeper than the adjustable shelves. It also has several accessories for different types of collections such as hinged and fixed periodical shelves, divider shelves, sloped multimedia shelves, pull out reference shelves along with the standard flat shelf.

Standard Adjustable Shelf

Divider Shelf

Sliding Reference Shelf

Closed Base Shelf

MJ Industries

Escalook

Escalook is MJ's latest addition to their ever growing product line. It's designed for displaying CD's, DVD's, periodicals and new books and some advantages of Escalook are:

- Easy accessibility of visual media due to the sloping nature of the shelving.
- All units are mounted on caster so they can easily be moved to different areas of the library.
- Component parts can be easily added and displayed at the ends of the ranges.

PALMIERI

DURECON WOOD

Along with Palmieri's various lines of furniture, they also manufacture both wood and wood/metal shelving. Their shelving comes standard with a flat wood end panel; however, they manufacture end panels to match each of their lines of furniture.

END

End Panels have the ability to make a library traditional with dark wood tones and moldings, modern with perforated metals, themes with cut outs or anything in between with flat wood and acrylics. Many libraries like to make end panels for more than decoration by adding end of range PAC station, display shelves or slatwall. With many of the custom millwork facilities we work with, such thing as wood inlays of logos are also a possibility.

End panels can make or break the look of a library. You can really show creativity with end panels with even the most simplistic of furniture.

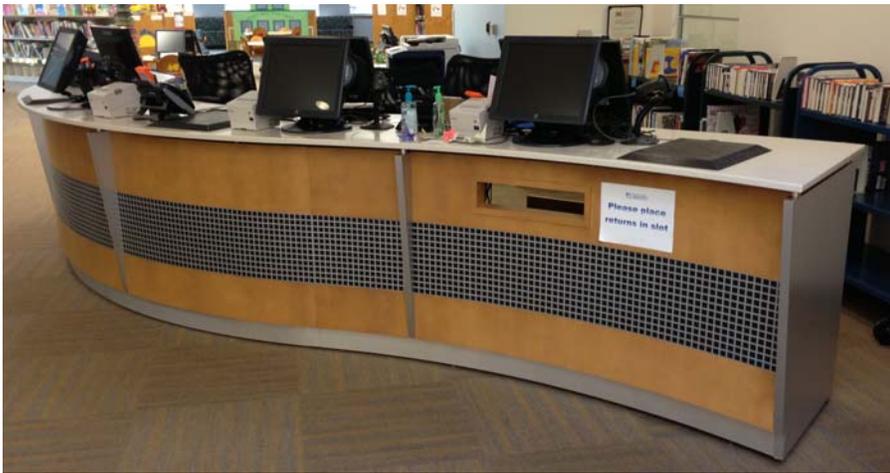

PANELS

Service

Like end panels, circulation and information desks have the ability to give your library a traditional, modern, themed or simple feel with the use of different materials and designs. Again with the use of our custom millwork facilities, we have the capabilities to manufacture any design that can be thought up. If a custom desk isn't what you're looking for, Palmieri Furniture also manufactures standard desks with a standard components. We like to take the time to sit down with the library staff to layout the entire desk to be sure it meets everyone's needs and is functional.

Desks

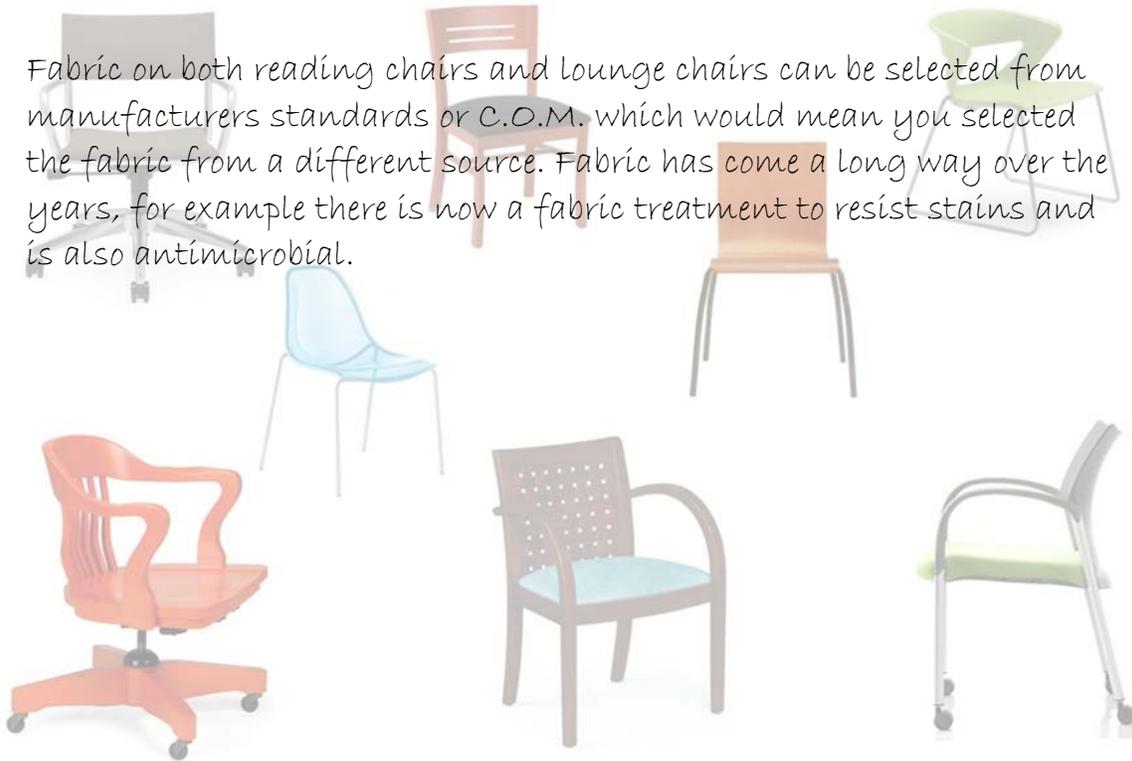

Seating

Seating comes in all shapes, sizes and materials such as wood, wood/metal, upholstered seats or backs or both. We've tried to showcase a few different chair styles here; however, with the hundred's of chairs that are available, it would be impossible for us to add thumbnails of all of them without it being a book in itself. Of course there's also stacking chairs which are shown on the miscellaneous pages.

Lounge seating is also available in many options and designs. With an even larger amount of lounge styles out there it's equally as difficult to showcase them all.

Fabric on both reading chairs and lounge chairs can be selected from manufacturers standards or C.O.M. which would mean you selected the fabric from a different source. Fabric has come a long way over the years, for example there is now a fabric treatment to resist stains and is also antimicrobial.

Social Media

Social Media is a versatile, comprehensive furniture solution that offers a range of features allowing for digital sharing for today's interactive environments.

- Tables are available in a series of shapes and sizes that accommodate any size group.
- Wire management is completely integrated allowing for a clean uncluttered installation.
- Finishes include unlimited combinations of wood veneer, laminate paint and chrome.
- Social Media can be placed anywhere in a room with options to accommodate double sided applications.
- Optional connections for power, data and video are integrated directly into Social Media.

PALMIERI

Miscellaneous/ Versatile Items

Task Chairs

We also offer a wide range of task seating with various options for circulation desks or computer areas.

Rover Pup

POP

These multipurpose stands add extra work space wherever it is needed whether it's as a laptop stand or as a supplemental table, it's the perfect size for so many applications.

Hurry Up!

These flip top tables are quick to set up and easy to reconfigure.

Perry

Anytime

These stack chairs are perfect for large meeting or community rooms. They are available in polypropylene or upholstered.

Wall Systems

Wall systems are the perfect product to build collaborative group study rooms without having to build permanent walls. They are completely customizable and endlessly reconfigurable.

Info Kiosk

These are ideal for areas where PCs are needed but space is tight. They can be single or double sided, used for public access computers or library catalog access.

Stationary Tables & Seating

These pieces are great for café areas where someone might grab a cup of coffee or a YA area for something different.

Booths

Yet another creative idea for group study and collaboration areas. Booths are perfect for young adult areas that need the extra dash of spice.

Open Seating

Benches or stools like these can be used for collaborative work or as a place someone with their hands full can sit and gather everything.

Get Electrified

With all of today's gadgets libraries are being faced with the dilemma of how to get the required electric that patron's need. We can assist you with this in a number of ways:

CONNECTRAC—Allows you to get electric anywhere in a room without the need for trenching or unsightly power poles. Just check out this recent installation at a university. You don't even know it is there.

PORTABLE POWER—units such as the Isle offer mobile power solutions that can be secured, but also easily moved. Position it among a cluster of chairs or tables to provide power for a group of users. Change the configuration, simply move the Isle and reposition in the new space.

POWERED LOUNGE—More and more lounge furniture today is being provided with power and USB ports.

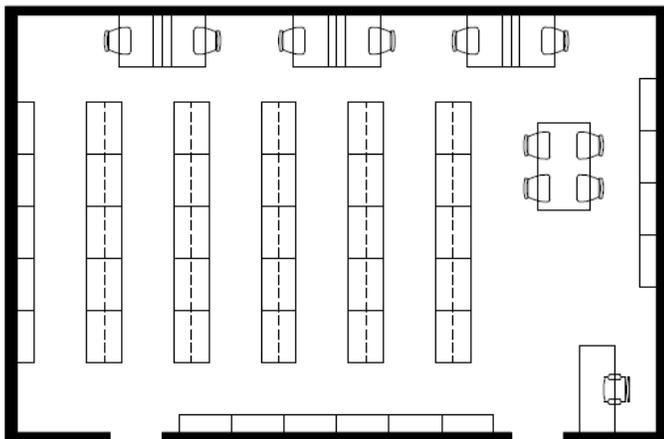

TABLE TOP UNITS—Add power to existing furniture by simply cutting a hole in the table top and dropping in a power unit.

Compact Shelving

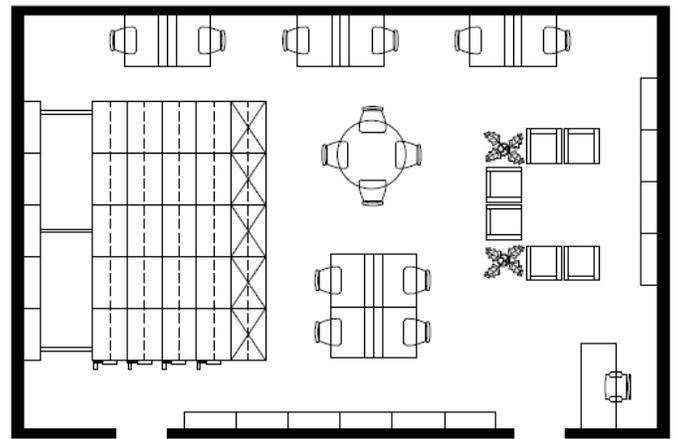

High density compact shelving is a necessity in any library where floor space is a problem. The use of high density compact shelving can more than double shelf space when compared to freestanding shelving.

Conventional Library

65 Faces of Bookstack Seating for 10
 455 Shelves 1 Reference Desk
 6,825 Volumes

Compact Shelving

75 Faces of Bookstack Seating for 14
 525 Shelves 6 Lounge Chairs
 7,875 Volumes 1 Reference Desk

Don't take just our word for it!

Below are letters from a few of our valued customers. Please check out our website at jpay.com for more!

J.P. Jay Associates, Inc.
Attn. Mr. Jim Malise
1313 Roth Avenue
Allentown, PA 18102

Dear Jim,

When the North Pocono Public Library began planning for a new building about four years ago, I began interviewing interior furnishing companies that could help me budget and plan for the needs of a new library. I was planning for a library that would meet the needs of my community for today and well into the future. I needed to work with a company that would be honest, flexible, provide me with estimated pricing (because I needed to know how much it was going to cost so that I could go out and fund raise for this new facility). I needed to find the company I wanted to work with well before we needed to place an order for furniture.

I met and talked with several companies, and immediately, Jay Malise, rose to the occasion. He spoke of his family based company that was committed to long term projects with libraries. He would be there to work with us through the process, and would keep us updated on pricing changes, would find the type of shelving and furniture we needed, and his company could order the shelving early (when we were ready) so that he could maximize the best pricing for the library.

He was not high pressured and he did not try to persuade us to any particular style or manufacturers -- early in the process he listened. And then he listened some more. He explored different products for us, and assisted us in getting connected with a public artist, Rachel Slack, who ultimately designed and created an amazing "Reading Tree" to highlight the new library's Children's Room.

Throughout the process, Jay and his team worked closely with our architect and planning team to coordinate how the shelving could be best laid out in the space available to provide us with good sight lines, growth room, and flexibility for different types of materials. He worked around walls that changed, windows that weren't there and then appeared, and other challenges -- unflustered and always on top of things. Jay and his team even helped us to plan where the electrical floor boxes would go so that all of the tables and study units would have optimum connectivity.

His early estimated pricing helped me to budget accordingly for the needs of our new library. He listened and sought after exactly the right kind of chairs, the right stains and the right laminate finishes to suit the style and taste of our library board and planning team.

The staff at JPJ has been accessible and accommodating throughout the entire process -- and I believe that we have a beautiful library, in part, because of the dedication and high quality service provided to the library through JPJ. I am so pleased and grateful to have the opportunity to work with Jay Malise, Chris Erdosy, and the dedicated installation team led by Tim. They stand behind the products they sell, and they put the customer's needs first.

I am attaching pictures of our beautiful new library -- Thank you JPJ for doing such a great job!

Sincerely,

Susan Jeffery
Library Director

Dear Jim, Jay and Chris,

Just wanted to send a note to say how much we enjoy working with your company. I feel like a high maintenance client-- either we don't know when we'll have money, or we have to spend money in three days, or we can only buy some now and some later, etc.

It seems whatever the issue or complication, you take it in stride and make it work. Thank you all for your accessibility, hard work and good humor. You are a great friend to libraries!

Sincerely,

Evelyn C. Mijchick

April 26, 2013

Mr. Jay Malise
J.P. Jay Associates, Inc.
1313 Roth Avenue
Allentown, PA 18102

Dear Jay,

It is with most sincere thanks, I write this letter of recommendation. Over the last two years, from planning to implementing, you and your staff have helped our vision become a reality. Going into this project I was like a fish out of water, but you helped ease my nerves and reassure me that our renovation project would turn out great, and that is has! I could not be more pleased.

You have been so very generous with your time and commitment to our project and for that I am truly grateful. Calling and going out of your way to stop by to check on our progress has been much appreciated. You worked so well with our architecture firm, Design 3 Architecture. Getting the two of your creative minds together has been very beneficial for the Library.

Our community is thrilled with the end product. It is so pleasing to see our children's room being used. Prior to the renovation, we did not have comfortable seating for families and the space was not very welcoming. Now, when I look into the room I see grandmother and grandson cozied up on the new seating enjoying a book together or father and son sitting on the new cool stools while searching the card catalog on our iPads. It is so nice to see the space being used and loved by our community.

On behalf of the Murrysville Community Library Board and Staff, I highly recommend J.P. Jay Associates, Inc. Your knowledge, professionalism and expertise are superior. It has been a true pleasure to work with your company throughout this entire renovation project. I look very forward to moving onto Phase II of library renovations and working with you again.

Sincerely,

Jamie K. Palo
