Wood & Steel Bookstack
Compact Shelving
Seating
Group Study
Collaboration Stations
Floor Layouts
Space Planning
Budget Pricing
Specification Writing
3D Renderings**

Rolling Shelving

With flexibility being the hottest topic in today's library, everything is expected to be able to be moved and reconfigured and this includes the shelving itself.

When the caveman invented the wheel they could not possibly have known how valuable it would one day become to the modern library. If you are striving to create a 21st century library then you know flexibility is a key factor in its success.

Shelving, whether it be for books or media, takes up on average 60% of the library's floor space. Take this simple test, walk around your library a few times a day and see just how many people are in the aisles. You will be amazed to find that most of the day nobody is occupying them, especially in nonfiction. How can that aisle space be put to more productive use?

MJ has the solution, rolling bookstack and rolling media shelving. This allows you to have your aisles when you do not need the space and have the space when you have more important needs and do not need the aisles.

Your concern may be two fold, maybe you do not like the look of wheels or maybe you do not want the public moving the shelving around. Again MJ has the solution invisible (concealed) wheels; only you and your staff know they are there and that the shelving can roll. Let us show you how rolling shelving can benefit your library.

A J. P. Jay Associates representative can assist you with your rolling shelving needs and can provide 3D drawings to give you a good visual of what you are planning.

Shhhhh!

Don't tell anyone, but this unit is...

...movable!

Flexibility, flexibility, flexibility.

When your shelving can move it allows you to open up an area to accommodate a large group or create a smaller area for story time or other functions. You can move a section of shelving to your entrance to highlight a particular collection or new books; the possibilities are endless.

Rolling shelving can be done as:

STRAIGHT SHELVING

Traditional Casters

Your shelving can be made to look traditional, modern or anything in between.

Concealed Casters

Curved Shelving

Built to Roll

Roll me anywhere

Media Display
