## **TABLES**

Tables fall under the same category as seating when it comes to providing a brochure that covers everything available. With that in mind, this brochure provides a sampling of the different styles and materials available.

We are finding that today's library is looking for more of a mix of materials; i.e. wood/metal, wood/3form, metal legs/laminate top, but the traditional wood table is also still highly regarded.

Because of the flexibility required by today's library, more and more tables are being done on casters and with the ability to easily nest and fold.

The purpose of this brochure is to touch on the most popular items available, but if you do not find exactly what you are looking for, please contact us. We are confident we have the product to fulfill your needs.

## Folding/Nesting

Muzo's Kite tables allow for a vast number of configurations.

Kite is more than a table system, it is a tool. You can add tables to expand when needed, rearrange them in seconds whenever called for and efficiently store/nest them when required.

Kite tables provide 30" of personal space no matter which layout you create and their patented design even levels tables on un-even floors.

## MUZO Kite

# Folding/Nesting

It's as easy as 1, 2, 3

The Kite table is also available in a tall (standing height) version.

Kite tables feature Muzo's patented Jewel caster, the only caster developed for an agile workplace. This caster ensures that the table is as stable as a fixed frame table when locked and prevents the need for linking devices. The Jewel caster ensures fluid transit and keeps the top of your footwear clean thanks to the locking pad.

By implementing Kite's Kite shaped table, rectangular table and semi-circle table, these are just some of the various configurations that can be accomplished.

## Folding/Nesting

Quickly and easily create table formations with Mini Mobile. Mini Mobile is perfect for classroom and learning environments.

## Mini Mobile

Writable surfaces encourage social interaction, team working and a creative, no fear learning culture.

Writable tops are available on all Kite, Versatilis, Mini Mobile and Wave tables.

Of course, there are many other types of folding/nesting tables available. Please contact us and we will be happy to talk with you to determine what table best fits your needs and budget.

## Folding/Nesting

# Contemporary

Not all library tables need to be your standard wood leg table. Add an industrial influence and a contemporary twist with tapered metal or wood legs or a wood cylinder insert.

What is more contemporary than a table with a translucent resin top? These great tables come short, tall, circular, square or rectangular keeping it simple and clean

# Contemporary

## Metal Base

With so many leg styles available, metal leg tables can work in any environment. Add optional electric, modesty panels, casters or dividers to create individual work areas with a single table.

**Metal Base**

Metal Base

## Wood Base

Nothing provides more warmth in a library than wood and wood base tables do not have to be your typical straight four-leg table. Tables can be panel base or have tapered, bent or have mission detail. Add a steel boot or even casters to give this traditional style table a more modern look

Wood Base

Wood Base

Specialty tables can be a collaboration table, a fun whiteboard table or an interactive work space.

# Specialty Tables

## Makerspace Tables

Makerspaces are as unique as the places they are used and therefore must be flexible and configurable to accommodate the demanding needs of these creative environments. Below are some of the many options available. Some can be customized with storage modules to house supplies and some even include and house their own stools when not in use.

Personal tables are a great way to turn any seat into a workstation. These units are easy to maneuver (some on casters) and one even doubles as a stool or a place to rest your bag. Some of these are even available with height adjustability.

## Personal Tables

## Adjustable Height

With flexibility being the key in today's library even table heights often need to be changed. Worry not. A number of today's tables are available with this option. Whether it be hand crank or push button, many tables can be set at the perfect work height.

Adjustable height tables need not be just square, round or rectangular. There are a number of shapes available; some even nest and fold and some can be grouped together to accommodate collaboration time or group study.

## Adjustable Height

These tables are adjustable height AND fold and nest.

## Study Carrels

If you want to offer your patrons a quiet haven for individual study or to block the hustle and bustle of the library around them, incorporate a few carrels into your floor plan. Carrels offer plenty of table space to spread out. Integrate electrical outlets and USB for charging their devices and your patrons will retreat to their own private setting.

Carrels can be traditional, modern or anything in between. The side panels are available in several heights allowing for various stages of privacy. These panels, can be 3form, wood, acrylic or perforated metal.

## Study Carrels

## Study Carrels

Carrels are available as single and double-face units and can be linked to form larger configurations. Hexagonal and pinwheel versions are also available. An optional reference shelf may also be specified for some styles.

## Study Carrels

Quad carrels allow for a single carrel to accommodate multiple patrons. These carrels can be classic and beautiful as well as fun and whimsical for the library's young patrons.

Carrels can also be used or house your OPAC computers. These pieces occupy a smaller footprint and are just the right size for easy patron use.

## Game Tables

All work and no play makes for a dull day. Incorporate a game table into your library for not only the young, but the young at heart.

Discovery tables will have your young patrons returning to the library over and over again. With reversible tops for Lego, Tinker Toy, train tracks and flat, smooth surfaces, these tables offer a variety of play possibilities. Optional LED lightbox provides another unique play surface. Large, locking storage drawers keep everything neat and accessible.

Checkers anyone?  
or maybe backgammon  
or chess?
