

SOCIAL DISTANCING – SAFETY & PROTECTION!

In these unprecedented times the safety of all those around us is of utmost importance, especially those on the front lines like medical staff, first responders and essential workers.

While certain restrictions may be lifted in the foreseeable future it is imperative that safety measures be implemented to protect all as we move forward.

J. P. Jay has a number of products available that can help your facility accomplish this.

These partitions are available in two lengths 3'-4" (single panel) or 10'-0" (three panel). The height of these panels is 6' 2".

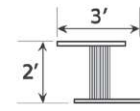

Screenflex's portable Plexiglass walls are the perfect solution for any public establishment. Whether in hospitals, primary care facilities, dentist offices, lobbies, hotels, libraries, schools or colleges and universities, these dividers act as a line of defense while still allowing communication and visual access.

Panels are constructed of 3/16" crystal-clear OPTIX acrylic which is non-yellowing and highly impact resistant.

Quantities under 25 can ship in 5-10 business days!

For those instances where separation and privacy is required, a fabric panel is an excellent solution. These panels also offer noise reduction.

Screenflex dividers arrive fully assembled and store compactly in a 2 ft. by 3 ft. space. Multiple units nest together.

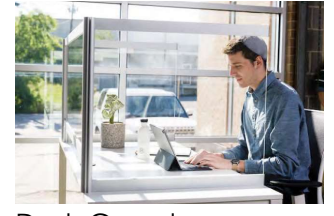

If you don't require a full divider, we can still assist with protecting your employees, customers, staff and patrons with a number of other items such as sneeze guards, counter shields and other barriers. Some of them are featured below. Quick ship available on some models.

Counter Shield - Lite

Counter Shield - Classic

Desk Guard

Shelter

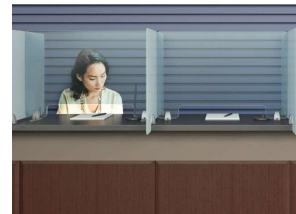

Hide

Hitch

qkCLEAN is a simple and effective protection for your keyboard to stop the spread of infections from person to person.

Enclave Sneeze Guard

Supple Sneeze Guard

Stop the spread of diseases in your facility! While dividers and sneeze guards are a great way to provide a protective barrier, what do you do when someone touches a keyboard or computer? J. P. Jay has the solution, qkCLEAN.
